## MWCC OPEN HOUSE ATTRACTS OVER 7000 VISITORS

### AN OPEN HOUSE MESSAGE FROM PRESIDENT ARTHUR F. HALEY

Sunday, November 10, was a great day for the College in our celebration of Open House! Countless people expressed their good feeling toward the Mount and offered congratulations to us in our moving into the new campus.

It is estimated that over 7,000 people visited the campus; and, so, I want to express my appreciation to the faculty and staff for the great effort in "putting our best foot forward." And I do wish to give a special note of thanks to Dean of Students, John P. Hogan, who chaired the committee that included all the members of the family of Mount Wachusett Community College — the students, faculty and staff.

In addition I would also like to thank the many members of the Greater Gardner Community who paid us a visit and whom I'm sure will help us in the future to live up to our motto of "Serving Man and his World".

One of the most popular displays at the Open House was the two color TV studios in which the visitors had an opportunity to see themselves on color television. Professor Vincent Ialenti is shown here discussing the Public Communications Curriculum with a group of visitors.

Professor Mickey Bent's Meister
serenaded the Open House visito
looking the commons area.

A pottery making demonstration by the students of the art curriculum provided an excellent opportunity for the visitors to get a close-up view of this unique art form.

Professor Edward Stevens seems
the effect that an audio tape dela
pattern.

People of all ages enjoyed the Open House, however, this young guest appears to be more concerned with the Chronicle photographer than she does in the demonstration being presented in the stress-analysis laboratory.

The science of acoustics was displayed in the physics lab for these interested visitors.

eside a display of the wide-variety ness Division, discusses the various o visitors.

Mount Wachusett's Cooperative Education Program with the Digital Equipment Corporation in Westminster will be detailed in the Chronicle's next edition. Here one of the faculty members demonstrates a graphic display unit provided by DEC as a training tool.

The botanical specimens under the microscopes held a great deal of fascination for visitors to the biology laboratories.

Professors Trinque and Frazee demonstrate some of the equipment used for training the students in the College's Health Care Curriculum.

Health Care Counselor Sandra Signor explains to an interested visitor the usefulness of these anatomical models as a teaching tool.
